## Section 1: IDENTIFICATION

**Product Name:** Crude Oil, Sweet PG I  
**Synonyms:** Not available.  
**Product Use:** Refinery feedstock.  
**Restrictions on Use:** Not available.  
**Manufacturer/Supplier:** Encana Corporation  
500 Centre Street SE  
Calgary, AB T2P 2S5  
**Phone Number:** (403) 645-2000  
**Emergency Phone:** Canutec: (613) 996-6666 or Cellular *666  
**Date of Preparation of SDS:** October 3, 2017

## Section 2: HAZARD(S) IDENTIFICATION

**GHS INFORMATION**

**Classification:**  
- Flammable Liquids, Category 1  
- Skin Irritation, Category 2  
- Germ Cell Mutagenicity, Category 1B  
- Carcinogenicity, Category 1A  
- Toxic to Reproduction, Category 2  
- Specific Target Organ Toxicity (Single Exposure), Category 3 - Narcotic Effects  
- Specific Target Organ Toxicity (Repeated Exposure), Category 2  
- Aspiration Hazard, Category 1

**LABEL ELEMENTS**

**Hazard Pictogram(s):**

- Flame
- Exclamation point

**Signal Word:** Danger

**Hazard Statements:**  
- Extremely flammable liquid and vapor.  
- Causes skin irritation.  
- May cause genetic defects.  
- May cause cancer.  
- Suspected of damaging fertility or the unborn child.  
- May cause drowsiness or dizziness.  
- May cause damage to organs through prolonged or repeated exposure.  
- May be fatal if swallowed and enters airways.

**Precautionary Statements**

**Prevention:** Obtain special instructions before use.  
Do not handle until all safety precautions have been read and understood.  
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
Keep container tightly closed.  
Ground and bond container and receiving equipment.  
Use explosion-proof electrical, ventilating, and lighting equipment.
Use non-sparking tools.  
Take action to prevent static discharges.  
Do not breathe mist, vapours, or spray.  
Wash thoroughly after handling.  
Use only outdoors or in a well-ventilated area.  
Wear protective gloves, protective clothing and eye protection.

**Response:**  
IF SWALLOWED: Immediately call a POISON CENTER or doctor.  
IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.  
IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell.  
Do NOT induce vomiting.  
If skin irritation occurs: Get medical advice/attention.  
Take off contaminated clothing and wash it before reuse.  
In case of fire use: Dry chemical, CO2, water spray or regular foam.

**Storage:** Store in a well-ventilated place. Keep container tightly closed.  
Keep cool.  
Store locked up.

**Disposal:** Dispose of contents/container in accordance with applicable regional, national and local laws and regulations.

**Hazards Not Otherwise Classified:** Not applicable.

**Ingredients with Unknown Toxicity:** None.

This material is considered hazardous by the OSHA Hazard Communication Standard, (29 CFR 1910.1200). This material is considered hazardous by the Hazardous Products Regulations.

**Section 3: COMPOSITION / INFORMATION ON INGREDIENTS**

Inhalation:

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. If breathing or the heart stops, trained personnel should immediately begin artificial respiration (AR) or cardiopulmonary resuscitation (CPR) respectively. Get medical attention immediately.

Acute and delayed symptoms and effects: May cause drowsiness or dizziness. May cause respiratory irritation. Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain. Excessive inhalation may cause headache, dizziness, confusion, loss of appetite and/or loss of consciousness. This product may contain small amounts of Hydrogen sulphide which may accumulate in confined spaces. Inhalation of Hydrogen sulphide may cause loss of sense of smell, major irritation of the respiratory tract, headache, nausea, vomiting, dizziness, and fluid buildup in the lungs (pulmonary edema), which can be fatal. High vapour concentrations of Xylene are anesthetic and central nervous system depressants. Inhalation of Toluene may result in peculiar skin sensations (e.g. pins and needles) or numbness. Very high concentrations may cause unconsciousness and death.

Eye Contact:

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a POISON CENTER or doctor if you feel unwell.

Acute and delayed symptoms and effects: May cause eye irritation. Signs/symptoms may include redness, swelling, pain, tearing, and blurred or hazy vision. Hydrogen sulphide may cause eye irritation at 1-20 ppm and acute conjunctivitis at higher concentrations.

Skin Contact:

IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. Call a POISON CENTER or doctor if you feel unwell. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Acute and delayed symptoms and effects: Causes skin irritation. Signs/symptoms may include localized redness, swelling, and itching.

Ingestion:

IF SWALLOWED: Do NOT induce vomiting. Immediately call a POISON CENTER or doctor. If vomiting occurs naturally, have victim lean forward to reduce the risk of aspiration. Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If breathing or the heart stops, trained personnel should immediately begin artificial respiration (AR) or cardiopulmonary resuscitation (CPR) respectively. Get medical attention immediately.
resuscitation (CPR) respectively. Get medical attention immediately.

**Acute and delayed symptoms and effects:** May be fatal if swallowed and enters airways. May cause gastrointestinal irritation. Signs/symptoms may include abdominal pain, stomach upset, nausea, vomiting and diarrhea. Ingestion of Isopentane may cause ventricular fibrillation and kidney, liver, and bone marrow damage. Swallowed liquids can vaporize in the trachea. Aspiration into the lungs is an asphyxiation hazard.

**General Advice:**
In case of accident or if you feel unwell, seek medical advice immediately (show the label or SDS where possible).

**Note to Physicians:**
Symptoms may not appear immediately. To monitor n-Hexane exposure, measure n-hexane in expired air. Analgesics may be necessary for pain management, there is no specific antidote. Monitor arterial blood gases in cases of severe aspiration.

---

### Section 5: FIRE-FIGHTING MEASURES

**FLAMMABILITY AND EXPLOSION INFORMATION**

Extremely flammable liquid and vapor. Will be easily ignited by heat, sparks or flames. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks). Vapor explosion hazard indoors, outdoors or in sewers. Runoff to sewer may create fire or explosion hazard. Containers may explode when heated. Many liquids are lighter than water. Substance may be transported hot. When heated, this material may evolve toxic and flammable Hydrogen sulphide.

If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

Fire involving Tanks or Car/Trailer Loads: Fight fire from maximum distance or use unmanned hose holders or monitor nozzles. Cool containers with flooding quantities of water until well after fire is out. Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank. ALWAYS stay away from tanks engulfed in fire. For massive fire, use unmanned hose holders or monitor nozzles; if this is impossible, withdraw from area and let fire burn.

**Sensitivity to Mechanical Impact:** This material is not sensitive to mechanical impact.

**Sensitivity to Static Discharge:** Take action to prevent static discharges. This material is sensitive to static discharge.

**MEANS OF EXTINCTION**

**Suitable Extinguishing Media:**
Small Fire: Dry chemical, CO2, water spray or regular foam.

Large Fire: Water spray, fog or regular foam. Move containers from fire area if you can do it without risk.

**Unsuitable Extinguishing Media:**
Do not use straight streams. CAUTION: This product has a very low flash point: Use of water spray when fighting fire may be inefficient.

**Products of Combustion:**

**Protection of Firefighters:**
Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic
gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution. Hydrogen sulphide is heavier than air and may collect in low lying areas and confined spaces. Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing will only provide limited protection.

Section 6: ACCIDENTAL RELEASE MEASURES

**Emergency Procedures:** As an immediate precautionary measure, isolate spill or leak area for at least 50 meters (150 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Ventilate closed spaces before entering. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). All equipment used when handling the product must be grounded.

**Personal Precautions:** Do not touch or walk through spilled material. Use personal protection recommended in Section 8. Don full-face, positive pressure, self-contained breathing apparatus.

**Environmental Precautions:** Prevent entry into waterways, sewers, basements or confined areas.

**Methods for Containment:** Stop leak if you can do it without risk. A vapor suppressing foam may be used to reduce vapors.

**Methods for Clean-Up:** Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers. Use clean non-sparking tools to collect absorbed material.

**Other Information:** See Section 13 for disposal considerations.

Section 7: HANDLING AND STORAGE

**Handling:**
Do not swallow. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep container tightly closed. Ground and bond container and receiving equipment. Use non-sparking tools. Take action to prevent static discharges. Do not breathe mist, vapours, or spray. Wash thoroughly after handling. Use only outdoors or in a well-ventilated area. Harmful concentrations of hydrogen sulfide (H2S) gas can accumulate in excavations and low-lying areas as well as the vapour space of storage and bulk transport compartments. See Section 8 for information on Personal Protective Equipment.

**Storage:**
Section 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Guidelines

Component

Petroleum [CAS No. 8002-05-9]
   ACGIH: No TLV established.
   OSHA: 500 ppm (TWA), 2000 mg/m³ (TWA);
          400 ppm (TWA) [Vacated];

Decane [CAS No. 124-18-5]
   ACGIH: No TLV established.
   OSHA: No PEL established.

Nonane [CAS No. 111-84-2]
   ACGIH: 200 ppm (TWA); (2011)
   OSHA: 200 ppm (TWA) [Vacated];

Octane [CAS No. 111-65-9]
   ACGIH: 300 ppm (TWA); (1979)
   OSHA: 500 ppm (TWA), 2350 mg/m³ (TWA);
         300 ppm (TWA); 375 ppm (STEL) [Vacated];

Heptane [CAS No. 142-82-5]
   ACGIH: 400 ppm (TWA); 500 ppm (STEL); (1979)
   OSHA: 500 ppm (TWA), 2000 mg/m³ (TWA);
         400 ppm (TWA); 500 ppm (STEL) [Vacated];

Hexane [CAS No. 110-54-3]
   ACGIH: 50 ppm (TWA); Skin, BEI (1996)
   OSHA: 500 ppm (TWA), 1800 mg/m³ (TWA); Skin.
         50 ppm (TWA) [Vacated];

Pentane [CAS No. 109-66-0]
   ACGIH: 1000 ppm (TWA); (2013)
   OSHA: 1000 ppm (TWA), 2950 mg/m³ (TWA);
         600 ppm (TWA); 750 ppm (STEL) [Vacated];

Isopentane [CAS No. 78-78-4]
   ACGIH: 1000 ppm (TWA); (2013)
   OSHA: No PEL established.

Butane [CAS No. 106-97-8]
   ACGIH: 1000 ppm (STEL); Explosion hazard (2012)
   OSHA: 800 ppm (TWA) [Vacated];

Isobutane [CAS No. 75-28-5]
   ACGIH: 1000 ppm (STEL); Explosion hazard (2012)
   OSHA: No PEL established.

Propane [CAS No. 74-98-6]
   ACGIH: Simple asphyxiant; Explosion hazard
   OSHA: 1000 ppm (TWA), 1800 mg/m³ (TWA);
Ethane [CAS No. 74-84-0]
   **ACGIH**: Simple asphyxiant; Explosion hazard
   **OSHA**: No PEL established.

Methane [CAS No. 74-82-8]
   **ACGIH**: Simple asphyxiant; Explosion hazard
   **OSHA**: No PEL established.

Xylene [CAS No. 1330-20-7]
   **ACGIH**: 100 ppm (TWA); 150 ppm (STEL); A4; BEI (1992)
   **OSHA**: 100 ppm (TWA), 435 mg/m³ (TWA);
           150 ppm (STEL) [Vacated];

Toluene [CAS No. 108-88-3]
   **ACGIH**: 20 ppm (TWA); A4; BEI (2006)
   **OSHA**: 200 ppm (TWA); 300 ppm (C); 500 ppm (Peak) (Maximum duration: 10 minutes.)
           100 ppm (TWA); 150 ppm (STEL) [Vacated];

Benzene [CAS No. 71-43-2]
   **ACGIH**: 0.5 ppm (TWA); 2.5 ppm (STEL); Skin; A1; BEI (1996)
   **OSHA**: 1 ppm (TWA); 5 ppm (STEL);

Ethylbenzene [CAS No. 100-41-4]
   **ACGIH**: 20 ppm (TWA); A3; BEI (2010)
   **OSHA**: 100 ppm (TWA), 435 mg/m³ (TWA);
           125 ppm (STEL) [Vacated];

Methylcyclohexane [CAS No. 108-87-2]
   **ACGIH**: 400 ppm (TWA); (1962)
   **OSHA**: 500 ppm (TWA), 2000 mg/m³ (TWA);
           400 ppm (TWA) [Vacated];

Cyclohexane [CAS No. 110-82-7]
   **ACGIH**: 100 ppm (TWA); (1964)
   **OSHA**: 300 ppm (TWA), 1050 mg/m³ (TWA);

Methylcyclopentane [CAS No. 96-37-7]
   **ACGIH**: No TLV established.
   **OSHA**: No PEL established.

Cyclopentane [CAS No. 287-92-3]
   **ACGIH**: 600 ppm (TWA); (1978)
   **OSHA**: 600 ppm (TWA) [Vacated];

1,2,4-Trimethylbenzene [CAS No. 95-63-6]
   **ACGIH**: 25 ppm (TWA); (1970)
   **OSHA**: No PEL established.

Polycyclic Aromatic Hydrocarbons [CAS No. 130498-29-2]
   **ACGIH**: A2; BEI; Exposure by all routes should be carefully controlled to levels as low as possible (1990); For Benz[a]anthracene
OSHA: 0.2 mg/m³ (TWA); For benzene-soluble fraction.

Hydrogen sulphide [CAS No. 7783-06-4]

ACGIH: 1 ppm (TWA); 5 ppm (STEL); (2009);
OSHA: 20 ppm (C); 50 ppm (Peak) (Maximum duration: 10 mins. once only if no other meas. exp. occurs.)
10 ppm (TWA); 15 ppm (STEL) [Vacated];

PEL: Permissible Exposure Limit
TLV: Threshold Limit Value
TWA: Time-Weighted Average
STEL: Short-Term Exposure Limit
C: Ceiling

Engineering Controls: Use ventilation adequate to keep exposures (airborne levels of dust, fume, vapour, gas, etc.) below recommended exposure limits. Use explosion-proof electrical, ventilating, and lighting equipment.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Skin and Body Protection: Wear protective clothing. Flame resistant clothing that meets the NFPA 2112 and CAN/CGSB 155.20 standards is recommended in areas where material is stored or handled.

Respiratory Protection: If engineering controls and ventilation are not sufficient to control exposure to below the allowable limits then an appropriate NIOSH/MSHA approved air-purifying respirator that meets the requirements of CSA Standard CAN/CSA-Z94.4-11, with organic vapor cartridge, or self-contained breathing apparatus must be used. Supplied air breathing apparatus must be used when oxygen concentrations are low or if airborne concentrations exceed the limits of the air-purifying respirators.

General Hygiene Considerations: Handle according to established industrial hygiene and safety practices. Consult a competent industrial hygienist to determine hazard potential and/or the PPE manufacturers to ensure adequate protection.

SAFETY DATA SHEET

Crude Oil, Sweet PG I
Date of Preparation: October 3, 2017

Ethylbenzene 100-41-4 3500 mg/kg (rat) 17800 µL/kg (rabbit) Not available.
Methylcyclohexane 108-87-2 > 3200 mg/kg (rat) > 86700 mg/kg (rabbit) 15227 ppm (rabbit); 1H
Cyclohexane 110-82-7 813 mg/kg (mouse) 180000 mg/kg (rabbit) Not available.
Methylcyclopentane 96-37-7 Not available. Not available. Not available.
Cyclopentane 287-92-3 11400 mg/kg (rat) Not available. 106000 mg/m³ (rat); 4H
1,2,4-Trimethylbenzene 95-63-6 5000 mg/kg (rat) Not available. 18000 mg/m³ (rat); 4H
Polycyclic Aromatic Hydrocarbons 130498-29-2 Not available. Not available. Not available.
Hydrogen sulphide 7783-06-4 Not available. Not available. 444 ppm (rat); 4H

Likely Routes of Exposure: Eye contact. Skin contact. Inhalation. Ingestion. Skin absorption.

Symptoms (including delayed and immediate effects)
Inhalation: May cause drowsiness or dizziness. May cause respiratory irritation. Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain. Excessive inhalation may cause headache, dizziness, confusion, loss of appetite and/or loss of consciousness. This product may contain small amounts of Hydrogen sulphide which may accumulate in confined spaces. Inhalation of Hydrogen sulphide may cause loss of sense of smell, major irritation of the respiratory tract, headache, nausea, vomiting, dizziness, and fluid buildup in the lungs (pulmonary edema), which can be fatal. High vapour concentrations of Xylene are anesthetic and central nervous system depressants. Inhalation of Toluene may result in peculiar skin sensations (e.g. pins and needles) or numbness. Very high concentrations may cause unconsciousness and death.

Eye: May cause eye irritation. Signs/symptoms may include redness, swelling, pain, tearing, and blurred or hazy vision. Hydrogen sulphide may cause eye irritation at 1-20 ppm and acute conjunctivitis at higher concentrations.

Skin: Causes skin irritation. Signs/symptoms may include localized redness, swelling, and itching.

Ingestion: May be fatal if swallowed and enters airways. May cause gastrointestinal irritation. Signs/symptoms may include abdominal pain, stomach upset, nausea, vomiting and diarrhea. Ingestion of Isopentane may cause ventricular fibrillation and kidney, liver, and bone marrow damage. Swallowed liquids can vapourize in the trachea. Aspiration into the lungs is an asphyxiation hazard.

Skin Sensitization: Not available.
Respiratory Sensitization: Not available.
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not available.

EFFECTS OF CHRONIC EXPOSURE (from short and long-term exposure)

Chronic Effects: Prolonged or repeated contact may dry skin and cause irritation. High vapour concentrations, generally greater than 10% by volume, may sensitize the heart and lead to lethal cardiac arrhythmias. Reports of chronic poisoning with Benzene, Toluene, Ethylbenzene or Xylene describe anemia, decreased blood cell count and bone marrow hypoplasia. Liver and kidney damage may occur. Repeated exposure of the eyes to high concentrations of Xylenes vapour may cause irreversible eye damage. Chronic inhalation exposure to xylene causes mid-frequency hearing loss in laboratory animals. Xylene reacts synergistically with n-hexane to enhance hearing loss. Immunodepressive effects have also been reported for Benzene. Repeated dermal application of crude oils in rats produced systemic toxicity in blood, liver, thymus and bone marrow. Prolonged or repeated skin contact with Nonane may cause liver and kidney damage and cause blood effects. Chronic inhalation of n-Hexane may cause peripheral nerve disorders and central nervous system effects. Prolonged or repeated inhalation of Isopentane may cause dizziness, weakness, weight loss, anemia, nervousness, pains in the limbs and peripheral numbness. This material contains Cyclohexane which is known to cause liver and kidney damage. 1,2,4-Trimethylbenzene may cause CNS changes, asthmatic bronchitis, and changes in the blood such as anemia or thrombocytopenia (i.e. low thrombocyte count that may affect the blood's ability to clot). This product contains Polycyclic Aromatic Hydrocarbons. Prolonged contact with these compounds has been associated with the induction of skin and lung tumours, anemia, disorders of the liver, bone marrow and lymphoid tissues. Hydrogen sulphide may reduce lung function; cause neurological effects such as headaches, nausea, depression and personality changes; eye and mucous membrane irritation; and damage to cardiovascular system.

CARCINOGENICITY: May cause cancer. Lifetime skin painting studies in animals with whole crude oils and crude oil fractions have produced tumours in animals following prolonged and repeated skin contact. Chronic exposure to benzene has been associated with an increased incidence of leukemia and multiple myeloma (tumour composed of cells of the type normally found in the bone marrow). This material contains Polycyclic Aromatic Hydrocarbons (PAHs), some of which are animal carcinogens.

---

**Mutagenicity:** May cause genetic defects.

**Reproductive Effects:** Suspected of damaging fertility or the unborn child. Studies exist which report a link to crude oil and reproductive effects including menstrual disorders.

**Developmental Effects**
- **Teratogenicity:** Not available.
- **Embryotoxicity:** Repeated dermal application of crude oils to pregnant rats produced maternal toxicity and fetal developmental toxicity and fetal tumours. Exposure to xylene has produced fetotoxic effects in animal studies. Exposure to Toluene may affect the developing fetus. Benzene has caused adverse fetal effects in laboratory animals.

**Toxicologically Synergistic Materials:** Xylene reacts synergistically with n-hexane to enhance hearing loss.

---

**Section 12: ECOLOGICAL INFORMATION**

**Ecotoxicity:** Not available.

**Persistence / Degradability:** Not available.

**Bioaccumulation / Accumulation:** Not available.

**Mobility in Environment:** Not available.

**Other Adverse Effects:** Not available.

---

**Section 13: DISPOSAL CONSIDERATIONS**

**Disposal Instructions:** Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements.

---

**Section 14: TRANSPORT INFORMATION**

**U.S. Department of Transportation (DOT)**
- **Proper Shipping Name:** UN1267, PETROLEUM CRUDE OIL, 3, PG I
- **Class:** 3
- **UN Number:** UN1267
- **Packing Group:** I
- **Label Code:** Flammable 9
## Section 15: REGULATORY INFORMATION

### Chemical Inventories

**US (TSCA)**
The components of this product are in compliance with the chemical notification requirements of TSCA.

**Canada (DSL)**
The components of this product are in compliance with the chemical notification requirements of the NSN Regulations under CEPA, 1999.

### Federal Regulations

**United States**
This SDS has been prepared to meet the U.S. OSHA Hazard Communication Standard, 29 CFR 1910.1200.

SAFETY DATA SHEET

Crude Oil, Sweet PG I

Date of Preparation: October 3, 2017

Cyclohexane 110-82-7 E
Methylcyclopentane 96-37-7 Listed.
Cyclopentane 287-92-3 Listed.
1,2,4-Trimethylbenzene 95-63-6 E
Polycyclic Aromatic Hydrocarbons 130498-29-2 Listed.
Hydrogen sulphide 7783-06-4 E

Note: E = Environmental Hazard; S = Special Hazardous Substance

California
California Prop 65:

WARNING This product can expose you to chemicals including Toluene, Benzene, Ethylbenzene, and Polycyclic Aromatic Hydrocarbons which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.
